**Landscaping for Birds' Melodious Songs of Praise**All winter long we have enjoyed the melodious chirping of birds outside our windows because we have planned our landscaping to attract and keep these birds all winter. Of course we feed them, too, but they must have a haven for resting and nesting near the home to stay put all year. If you don't already have trees, shrubs, and vines near your home, consider spacing these around your perimeter, along with birdbaths and feeders, so you too will be able to enjoy their melodious songs all year long.◆
