

Now is the time to set out broccoli, Brussels sprouts, cabbage, cauliflower, celery, bulb fennel, turnips, kohlrabi, rutabagas, and kale seedlings. Direct sow carrots, beets, turnips, lettuce, spinach, Mache, Chinese cabbage, radishes, and arugula. You may need to cover these on subfreezing nights, as cold temperatures come and go during the latter part of fall, but extending the growing season, by getting a third or fourth crop, is well worth the effort!
